

Datasheet

Discone One

Part No:
DCN.01.035111

Description:

400-6000MHz Wideband Discone Omnidirectional 5G/4G Antenna
with 300mm TGC-200 & SMA(M)ST

Features:

High efficiency antenna covering 400-6000MHz
Covers all worldwide cellular 5G/4G Cat-M/ LTE-M and NB-IoT bands
Permanent/Wall/Pole mount antenna
IP67 rated waterproof enclosure
Cable: 300mm TGC-200
Connector: SMA(M)ST
Dimensions: 200*200*203mm
RoHS & Reach Compliant

1. Introduction

The Taoglas Discone One DCN.01 is a wideband, omnidirectional antenna that has been expertly engineered to cover all worldwide 5G and 4G bands, including all sub-6GHz deployments across the 400MHz to 6000MHz spectrum. It is designed primarily for use with 5G/4G modules and devices that require high efficiency – the Discone One boasts over 50% across the entire spectrum. With a high peak gain of up to 6.6dBi, it delivers best-in-class throughput on all major cellular bands worldwide.

It is innovatively designed to deliver reliability on new, dedicated mission-critical communications bands between 400-500MHz. Additionally, it covers extended 4G, band 71, and all 5G NR Sub 6GHz bands while also covering 3G/2G bands to allow for fallback when 5G/4G isn't available – keeping applications and devices connected when it's most needed.

Typical applications include:

- Mission-Critical Smart Grid Applications
- Remote Asset and Pipeline Monitoring
- Next Generation OEM Automotive Connectivity
- First Responder and Emergency Services
- Military and Defense Applications

The heavy-duty, fully IP67 rated external ABS enclosure allows this antenna to be mounted in harsh external environments where a robust, waterproof antenna is required. With high peak gains and high efficiencies over frequencies from 400-6000MHz, the Discone One is a fantastic solution for wideband cellular applications.

5G applications demand high-speed data uplink and downlink. High efficiency and high gain antennas are necessary to achieve the required signal-to-noise ratio and throughput required to solve these challenges. Low-loss TGC-200 cable is used to keep efficiency high over long cable lengths. The cable length and connector types are customizable. Contact your regional Taoglas customer support team for more information.

2. Specifications

Electrical									
Band	Frequency (MHz)	Condition	Efficiency (%)	Average Gain (dB)	Peak Gain (dBi)	Impedance	Max Input Power	Polarization	Radiation Pattern

6. Installation Guidelines

Installation Instructions

DCN.01

Wideband, Omnidirectional Discone antenna

Installation Requirements

Antenna Components:

Antenna Housing (x1)

Tightening Nut (x1)

Adhesive Base (x1)

Coaxial Cable (x1)

Mounting Bracket (x1)

Pole Mount:

13mm [1/2"] Socket Wrench

M8 U Bolt (x2)

M8 Flat Washer (x 4)

M8 Spring Washer (x4)

M8 Hex Nut (x4)

Pole Mount Clip (x2)

Mounting Bracket (x1)

- Pole Diameter Range:
34.5mm [1.3"] - 65.5mm [2.5"]

Wall Mount:

#1 Phillips Screwdriver(Not Included)

Drill (Not Included)

Tapping Screw 4 x 25mm [5/32 x 1"]

Screw (x 3), 6 x 24mm [1/4 x 15/16"]

Wall Mount Stud (x3)

Mounting Bracket (x1)

Hardware Installation

The DCN.01 antenna can be installed via 2 different methods: pole mount and wall mount. Please refer to the appropriate section below for your installation requirements.

Pole Mount

1. Determine the desired antenna location on the pole. Align a mount clip with the two large, bottom screw holes on the bracket. Pressing against the pole at the desired height, insert the U Bolt from the back of the pole, through the mount clip and into the mounting bracket.

2. Insert the flat washer onto each U Bolt side. Insert a spring washer over the flat one. Insert a hex nut onto each U Bolt end and lightly screw the nut in place by hand. Use a socket wrench to tighten both nuts so the bracket is secured in place.

3. Repeat steps 1 and 2 with the top mount clip and U Bolt. Ensure all nuts are properly tightened and the mounting bracket is firmly in place on the pole.

4. Unscrew the tightening nut from the antenna body and slide the coaxial cable through the split in the Nut.

5. Clean the top surface of the mounting bracket and ensure it is completely dry before installing the antenna. Remove the protective liner from the base adhesive of the antenna. Note: Once exposed, avoid contact with the adhesive.

6. Route the coaxial cable through the top opening on the mounting bracket. Align the antenna and press down to secure the adhesive base in place. Note: Avoid sharp bends when routing coaxial cable.

7. Insert the tightening nut and tighten to secure the antenna in place.

Note: Max. Torque for the tightening nut is 10N.m

8. Completed Installation

Wall Mount

1. Using the mounting bracket as guide, mark the position of the wall screws to the desired location of the bracket (use the three smaller openings on the bracket). Drill holes for the wall mount studs (6mm [1/4"] diameter, min. 25mm [1"] depth) and secure the studs in place. Insert screws through the bracket hole and into the wall studs. Drive the screws in and tighten to secure the mounting bracket in place.

2. Unscrew the tightening nut from the antenna body and slide the coaxial cable through the split in the Nut.

3. Clean the top surface of the mounting bracket and ensure it is completely dry before installing the antenna. Remove the protective liner from the base adhesive of the antenna. Note: Once exposed, avoid contact with the adhesive.

4. Route the coaxial cable through the top opening on the mounting bracket. Align the antenna and press down to secure the adhesive base in place. Note: Avoid sharp bends when routing coaxial cable.

5. Insert the tightening nut and tighten to secure the antenna in place.

Note: Max. Torque for the tightening nut is 10N.m

6. Completed Installation

Notices

Caution

To comply with FCC RF Exposure requirements in section 1.1310 of the FCC Rules, antennas used with this device must be installed to provide a separation distance of at least 20 cm from all persons to satisfy RF exposure compliance.

Warning

Do not Operate the transmitter when someone is within 20 cm of the antenna.
Do not operate the equipment in an explosive atmosphere.

European Waste Electronic Equipment Directive 2002/96/EC

Please ensure that your old Waste Electricals and Electronics are recycled do not throw them away into standard waste.

Waiver: This document represents information compiled by Taoglas to the best of our current knowledge. 7. Packaging

1 pc DCN.01.035111 Pole Mount Kit
1 SET / Kit box
Box Dimensions - 140 x 118 x 42mm
Weight - 387g

1 pc DCN.01.035111
1 pc Bracket Assembly for Wind loading
1 pc Partition
Weight - 1.78Kg

2 pcs per Carton
Carton Dimensions - 524 x 415 x 260mm
Weight - 5.86Kg
